Radio shack weather radio manual 12-260

Photo Courtesy: Pixabay In today's busy world, it's always good to know what's going on with the weather. Whether you're at home or on the go, you can't afford to miss weather warnings. That's why it's important to have a weather radio. There are so many weather radios out there that it can be tough to find the model that's right for you. Here's a list of the best weather radios. Check it out to find the one that fits your needs. MORE FROM CONSUMERSEARCH.COM By Tricia Goss Scanners are hand held radio receivers that can be programmed to pick up specific frequencies. These frequencies are often radio channels used by local emergency services, citizens band radio, railroads or airports, listened to by hobbyists, journalists and others. Radio Shack has been a leading producer of electronics, such as scanners, since 1921. Learning how to use a Radio Shack scanner can keep you informed about local events as they occur and even provide entertainment. Power up the scanner. Radio Shack scanners can obtain power from three different sources: internal batteries; an AC power supply cord; or a DC vehicle adapter. Turn on the scanner by turning the volume knob clockwise. The screen will display the message, "Welcome to Dual Trunking." Turn the "Squelch" knob clockwise until the indicator is pointed to "Min." Slowly turn the dial counterclockwise until there is no background noise. Press "Manual." Enter the number (0 - 9) of the bank in which you want to store the first frequency. Radio Shack scanners have ten banks, which each store 100 channels. Press "Manual" again to store the bank number. Press the "Func" key and then press the up or down arrow key. The channels on the selected bank will move up or down, from 1 - 100. Select a channel that does not yet contain a frequency. Press the "PGM" key and the "M" displayed on the screen will change to "P" for "Program." Type in the frequency you wish to store, using the "/Delay" key to cause the scanner to pause at this frequency for two seconds, or until audio is no longer detected. Press "Enter." This will store the frequency. Repeat steps 3 - 5, entering each desired frequency. This national chain offers a wide selection of electronics, cell phones, batteries and power, and DIY components and equipment. You can often luck out here, scoring better prices than at the other big guys. Bedside Weather Radio12-260What's IncludedMounting Weather RadioYou can place your weather radio on a flat surface, such as a desk, shelf, or table, or mount it on the wall. To mount it on the wall, you need two screws (not supplied) with heads that fit into the keyhole slots on the bottom of the weather radio.1. Use a pencil to mark the mounting screw locations 311/16-inch (94mm) apart on the wall.2. Drill a hole at each marked location. Thread a screw into each hole, making sure each screw's head extends about ¼ inch (6.5mm) from the wall.3. Align the keyhole slots on the bottom of the weather radio with the screw heads, and slide the radio down to secure it.4. Extend the antenna upward.Connecting PowerYour weather radio uses the supplied 6V, 300 mA AC adapter for power. You can also install four AA batteries (not supplied) for backup power if AC power fails or is temporarily disconnected. AC Power Connection1. Insert the adapter's barrel plug into the weather radio's DC 6V jack.2. Plug the other end of the adapter into a standard AC outlet.3. Route the adapter's cord through the strain relief.Installing Backup Batteries1. Slide off the battery compartment cover to remove it.2. Place four AA batteries in the compartment as indicated by the polarity symbols (+ and -) marked inside.3. Replace the cover.The battery icon (0) shows battery power. When all segments are lit, the batteries have full power. The number of lit segments decrease as battery power decreases. DC 6VStrain ReliefStep OneStep Three Weather RadioAC AdapterStep Two Owner's ManualUsing the Weather Radio for the First TimeWhen you turn on the weather radio the first time, all LCD segments light for a few seconds, and the automatic channel search begins. When an active channel is found, E appears. If no channels are detected, © flashes.1. Connect the weather radio to AC power and install the backup batteries.2. Extend the weather radio's antenna.3. Press WEATHER/SNOOZE to listen to the weather broadcast.4. Repeatedly press e or d to adjust the broadcast volume to the desired level. VOL and the volume level (1- 8) appear.5. Press WEATHER/SNOOZE to turn off the broadcast.6. Repeatedly press e or d to adjust the weather alert volume to the desired level. VOL and the volume level (1- 8) appear.Step FourFunction SetupFunction setup allows you to select a channel, and set the alarm and clock time. You can also enable or disable the signal loss reminder so that an alert sounds when the radio signal is lost. Set Channel1. Hold down SET until you hear a beep. CH1-7(current channel number) flashes. 2. Press SET to turn on the broadcast audio. NOAA appears.3. Press e or d to manually change the channel. Or, hold down e or d to automatically search for the strongest channel.4. Press SET to confirm the selected channel number. The alarm time flashes.5. Hold down SET to return to the normal display. Or, press SET to set the alarm time (proceed to number 4 below).Set the Alarm Time 1. Hold down SET until you hear a beep. CH1-7(current channel number) flashes. 2. Press e once. The current alarm time flashes.3. Press SET. The alarm hour digits flash. 4. Press or hold down e or d to set the alarm hour. 5. Press SET to confirm. The alarm minute digits flash. 6. Press or hold down e or d to set the alarm minutes. 7. Press SET to confirm. The clock time flashes.8. Hold down SET to return to the normal display. Or, press SET to set the clock time (proceed to number 4 in the next section).Set the Clock Time1. Hold down SET until you hear a beep. CH 1-7(current channel number) flashes. 2. Press e twice. The current clock time flashes.3. Press SET. The clock hour digits flash. 4. Press or hold down e or d to set the hour. 5. Press SET to confirm. The minute digits flash. 6. Press or hold down e or d to set the clock minutes. 7. Press SET to confirm. % and the current signal loss reminder setting (On or OFF) appear.8. Hold down SET to return to the normal display. Or, press SET to enable or disable the signal loss reminder (proceed to number 4 below).Enable/Disable the Signal Loss Reminder1. Hold down SET until you hear a beep. CH 1-7(current channel number) flashes.2. Press e three times. The current setting (On or OFF) and %appear. 3. Press SET. % flashes.4. Press e or d to toggle between On and OFF.5. Press SET to confirm. CH and the current channel number flash.6. Hold down SET to return to the normal display. Or, press SET to return to channel setting mode.SET —Hold for two seconds to enter function setup mode, or pressto confirm selections.e and d— Press to adjust the broadcast and alert volume, or to set the channel number, clock time, and alarm time values.WEATHER/SNOOZE — Press to start and stop the weather broadcast or to enable the alarm or snooze feature.Ó BATTERY NOTES Ó• Dispose of old batteries promptly and properly. • Do not burn or bury batteries. • Use only fresh batteries of the required size and recommended type. • Do not mix old and new batteries, different types of batteries, or rechargeable batteries of different capacities. • If you do not plan to use the weather radio for a month or more, remove the batteries. Batteries leak chemicals that can damage electronic parts.Ó NOTES Ó• PM appears for a PM hour in alarm and clock setting mode. • The signal loss reminder beep does not sound when the NWS broadcast is on. • The backlight is always on when operating with AC power. When operating on battery power, the backlight turns on only when you press a button.Alarm TimeClock TimeSignal Strength Indicator Bedside Weather Radio 12-260 WEATHER/SNOOZE — Press to start and stop the weather broadcast or to enable the alarm or snooze feature, and — Press to adjust the broadcast and alert volume, or to set the channel number, clock time, and alarm time values. Step One Mounting the Weather Radio You can place your weather radio on a flat surface, such as a desk, shelf, or table, or mount it on the wall. To mount it on the wall, you need two screws (not supplied) with heads that fit into the keyhole slots on the bottom of the weather radio. 1. Use a pencil to mark the mounting screw 11 locations 3 / -inch (94mm) apart on the 16 wall. 2. Drill a hole at each marked location. Thread a screw into each hole, making sure each screw's head extends about ¼ inch (6.5mm) from the wall. 3. Align the keyhole slots on the bottom of the weather radio with the screw heads, and slide the radio down to secure it. 4. Extend the antenna upward. What's Included • Owner's Manual • Weather Radio • AC Adapter Signal Strength Indicator SET — Hold for two seconds to enter function setup mode, or press to confirm selections. Step Two Connecting Power Your weather radio uses the supplied 6V, 300 mA AC adapter for power. You can also install four AA batteries (not supplied) for backup power if AC power fails or is temporarily disconnected. AC Power Connection 1. Insert the adapter's barrel plug DC 6V into the weather radio's DC 6V jack. 2. Plug the other end of the adapter into a standard AC outlet. 3. Route the adapter's cord Strain Relief through the strain relief. Installing Backup Batteries 1. Slide off the battery compartment cover to remove it. 2. Place four AA batteries in the compartment as indicated by the polarity symbols (+ and -) marked inside. 3. Replace the cover. The battery icon () shows battery power. When all segments are lit, the batteries have full power. The number of lit segments decrease as battery power decreases. Step Three Using the Weather Radio for the First Time When you turn on the weather radio the first time, all LCD segments light for a few seconds, and the automatic channel search begins. When an active channel is found, 1. Connect the weather radio to AC power and install the backup batteries. Alarm Time 2. Extend the weather radio's antenna. 3. Press WEATHER/SNOOZE to listen to the weather broadcast. 4. Repeatedly press or to adjust the broadcast volume to the desired level. VOL and the volume level (1- 8) appear. Clock Time 5. Press WEATHER/SNOOZE to turn off the broadcast. 6. Repeatedly press or to adjust the weather alert volume to the desired level. VOL and the volume level (1- 8) appear. Step Four Function Setup Function setup allows you to select a channel, and set the alarm and clock time. You can also enable or disable the signal loss reminder so that an alert sounds when the radio signal is lost. Set Channel 1. Hold down SET until you hear a beep. CH1 - 7(current channel number) flashes. 2. Press SET to turn on the broadcast audio. NOAA appears. 3. Press or to manually change the channel. Or, hold down or to automatically search for the strongest channel. 4. Press SET to confirm the selected channel number. The alarm time flashes. 5. Hold down SET to return to the normal display. Or, press SET to set the alarm time (proceed to number 4 below). Set the Alarm Time 1. Hold down SET until you hear a beep. CH1 - 7(current channel number) flashes. 2. Press once. The current alarm time flashes. 3. Press SET. The alarm hour digits flash. 4. Press or hold down or 5. Press SET to confirm. The alarm minute digits flash. 6. Press or hold down or 7. Press SET to confirm. The clock time flashes. 8. Hold down SET to return to the normal display. Or, press SET to set the clock time (proceed to number 4 in the next section). BATTERY NOTES • Dispose of old batteries promptly and properly. • Do not burn or bury batteries. • Use only fresh batteries of the required size and recommended type. • Do not mix old and new batteries, different types of batteries, or rechargeable batteries of different capacities. • If you do not plan to use the weather radio for a month or more, remove the batteries. Batteries leak chemicals that can damage electronic parts. E © appears. If no channels are detected, Set the Clock Time 1. Hold down SET until you hear a beep. CH1 - 7(current channel number) flashes. 2. Press twice. The current clock time flashes. 3. Press SET. The clock hour digits flash. 4. Press or hold down 5. Press SET to confirm. The minute digits flash. 6. Press or hold down 7. Press SET to confirm. reminder setting (On or OFF) appear. 8. Hold down SET to return to the normal display. Or, press SET to enable or disable the signal loss reminder (proceed to number 4 below). Enable/Disable the Signal Loss Reminder 1. Hold down SET until you hear a beep. CH1 - 7(current channel number) flashes. 2. Press three times. The current setting (On or OFF) and appear. 3. Press SET. to set the alarm hour. 4. Press or 5. Press SET to confirm. CH and the current channel number to set the alarm minutes. flash. 6. Hold down SET to return to the normal display. Or, press SET to return to channel setting mode. • PM appears for a PM hour in alarm and clock setting mode. • The signal loss reminder beep does not sound when the NWS broadcast is on. • The backlight is always on when operating with AC power. When operating on battery power, the backlight turns on only when you press a button. flashes. or to set the hour. or to set the clock minutes, and the current signal loss flashes. to toggle between On and OFF.
